Welcome to SpecAlert

SpecAlert is a new and exciting opportunity for the specifier and the building product supplier to interact and dramatically increase the opportunity for specified products to remain specified on projects.

SpecAlert is available to all approved building products and services suppliers. SpecAlert is a very simple and extremely quick method for the specifier to alert the building product supplier that their product has been specified on a project and who the next contact is, especially important if the specifier will no longer be involved in the project.

SpecAlert is a direct link between the specifier and the building product supplier with no other entity involved. The web based SpecAlert form can be filled in and sent by the specifier in under 1 minute.

For more information or to become part of SpecAlert please [contact Aimsnz](#).
